

# START FAST. FINISH STRONG.

Neo Analytics BI Accelerator is designed to jumpstart your banking BI capabilities and help you reach new heights

Whether it's for IT, finance or marketing - the shaping and management of current and legacy data can be complex, expensive, and time consuming. Not to mention legal and regulatory challenges, privacy, security, data quality and the talent challenge.

**THE BOTTOM LINE IS THAT YOU CAN'T WORK WITH WHAT YOU CAN'T EFFECTIVELY ACCESS AND DIGEST**

## BANKING ANALYTICS TO THE RESCUE

Built specifically to source data from the Data Action core banking system, the BI Accelerator provides your bank with cloud-base big data and analytic tooling that helps you make smarter decisions, focus resources efficiently, and improve your overall performance.

### DATA LED

Incorporating data from CBS, LOS, IB and CRM systems to enhance the data coming from the DA core.

### CLOUD BASED

Ingested data lands in your choice of public cloud provider (Azure, AWS or GCS).

### SMART BY DESIGN

Fully packed with integrated AI and Machine Learning capabilities that can help you better manage and consume your data.

### SELF-SERVICED

Deployed entirely within your network environment and your control, and with ready access to preconfigured BI reports.

## IT'S TIME YOU PERFORM AT YOUR BEST

Whether its business-as-usual or dealing with unstable economic conditions, the ability to easily access and digest data can help your bank:

- > Get a better understanding of the business and its customers
- > Reduce dependency on RFW's for additional data extracts or code
- > Improve products and services
- > Optimise marketing activity
- > Get better at forecasting and predictions
- > Remain agile
- > Enhance operational efficiency
- > Reduce risk

## KEEPING YOU ON TOP OF YOUR GAME

Our data platform includes everything you need to build your decision making confidence

## REPORTING DATA MODELS

### INTEGRATED DATA INGESTION AND MANAGEMENT

- > Work with data that is current and avoid the static definitions and drift of relevance in canned reports.
- > Move beyond IRISS and Onbase to a more modern, intuitive and relevant reporting architecture.

### ADVANCED ANALYTICS, REQUIREMENTS ANALYSIS AND REPORT DESIGN

- > Work with data models that align with your processes and remain constantly relevant.
- > Leverage our 30 years of experience at DA to mitigate complexity and inefficient data access.

### MODERN DATA ARCHITECTURE

- > Improved speed and performance.
- > Seamless self service capabilities.
- > Improved data access and core source integration.

## EXPERIENCE YOU CAN TRUST

We have a combined experience of more than 225 years in banking systems and data management, and together we have already helped DA customer institutions, but more importantly we've already solved your problem and we're regulated, just like you.

*Neo Analytics has been able to provide expertise, speed and value in delivering the initial phase of our Data Warehouse. This work has been coupled with specific data model development which has assisted greatly in enhancing its capability and efficiency.*
